## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hassbrouk (USPN 3,001,726).

Hassbrouk discloses a system for cooling a rocket motor combustion chamber (4) including a plurality of tubes (8) which discharge into a torroidal coolant-collection manifold (10). There are a plurality of vanes (28) where the coolant flow from the tubes enter the manifold. The purpose of the vanes is to reduce pressure loss and increase pressure uniformity (col. 1 lines 15-22).

### ***Allowable Subject Matter***

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Coburn and Fint et al disclose coolant collection manifolds.
